

5 Beds, 5 Baths - 5,379 sq/ft - \$3,250,000

Modern contemporary custom-built masterpiece, lovingly designed by the head of Design and Construction for Four Seasons Hotels. This exquisite custom home features Brazilian Cumaru hardwood flooring through the main and second levels, Tuscan limestone, Cherry Wood Doors, anodized aluminum windows, 3 gas fireplaces, built-in speakers, dazzling bathrooms wrapped in stone, and a walk-out completely finished lower level with apartment. Gorgeous sweeping views of the ravine wrap around. The entire house is airy and bright, facing the ravine with no need for window coverings, and the clever design allows the light to pour in. The chain on the front deck is turned into a magnificent ice sculpture during the winter. Basement can be a separate apartment or Nanny Suite. Backyard has been designed to accommodate a pool. Every detail of this marvelous residence is meticulous and thoughtful. Truly spectacular.
